Subject: variance application 60709

Re: variance application 60709

I received a letter describing the variance applied for on lot 1, District Lot 28, Newcastle District, Plan 34851.

I live 3 lots from the lot under discussion.

I have one concern about the variance and that is the siting of the septic system. It is the septic system that could contaminate the stream. Many people in our community of Bowser are working hard to rehabilitate our streams so that they can again become salmon bearing streams. I do not want to see one of our local streams carrying runoff from a septic system.

I do not oppose the variance on the setback from a watercourse from 15.0 metres to 10.0 metres for the building site, but only if the septic system is the type that will guarantee that there will be no damage to the watercourse.

Re: REQUEST FOR VARIENCE

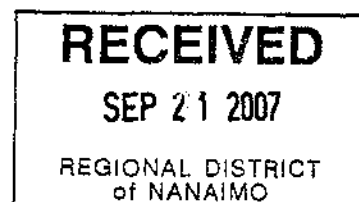

3410 Carmichael Road
Pid 026149958
Lot 5 -- PLAN VIP 78139
DISTRICT LOT 78
NANOOSE LAND DISTRICT

I have been advised that a miscalculation during the excavation of the above mentioned lot resulted in a .6 meter [equivalent of approximately 24 inches] error in the allowable height for the residence currently under construction at the above address.

I have also been advised that an application is being submitted to the Regional District of Nanaimo to grant a height variance of .6 meters [equivalent to 24 inches] on the above property.

This is to confirm that I have no objection to the variance being approved.
