Subject: Re: Proposed incinerator.

Thanks Matt,

Waste will always be somewhat of a Pandora's box of troubles, however, this particular proposal: a VI location, cannot help but be a 2 step forward = 3 steps back, when ongoing and long-term environmental ramifications are soberly assessed.

It is very unfortunate that the *aggregation of cons* which will result from locating a WTE installation on Vancouver Island have, unfortunately, been masked by the "excitement" of the much heralded *pro's* whereas, if situated on the mainland, the pros will outweigh the cons.

Subject: speaking to the board on June 25

Hi Mat,

Thank you for following up on my phone message.

I am requesting the opportunity to speak to the RDN board on June 25, 2013.

Re: Waste Energy Plans.

The long-term ramifications are ill-understood, the siting is very poorly conceived, and completely counterintuitive to our eco-tourism thrust.
