

**TO:** Board of Directors

**DATE:** February 2, 2015

**FROM:** Paul Thorkelsson  
Chief Administrative Officer

**SUBJECT:** 2014 Updates and 2015 Service Area Work Plan Projects and Activities

---

**PURPOSE:**

To provide the Board of Directors with an overview of the status of the 2014 Service Area work plan projects and activities, and to present the Service Area work plan projects and activities for 2015.

**BACKGROUND:**

On an annual basis the General Managers and Department Directors of the RDN oversee the preparation of the list of work plan projects and activities for the various areas of their departments for the upcoming year. These projects and activities are presented for the Board's information, with status updates provided during the year. Projects and activities are developed based on the direction obtained through the Board's Five Year Financial Plan, the Strategic Plan, long term program plans (such as the Transit Business Plan, Regional Growth Management Plan, Liquid Waste Management Plan and the Solid Waste Management Plan), anticipated departmental activities and specific Board direction that occurs throughout the year.

Staff and Directors of the RDN have a strong interest in managing the workload in the various Departments to best assure the planned work for the year is completed in a timely manner or is supplanted by other priorities in an organized manner. The Board had suggested that more regular periodic reporting on the annual work plans would be beneficial to understand the work load of the respective Departments, as well as the status of planned projects, how additional projects brought forward during the year are included in the work plans, and how reprioritization of projects can be tracked.

The work plans attached to this report include a colour tracking notation for each of the various projects and activities, that shows whether they are on track, complete, behind schedule or due date changes, or significantly delayed / reprioritized. The overview also provides a brief update/explanation of the project status. In addition, new work brought forward as a result of Board direction during the year will be added and highlighted within the tracking document for the respective Departments.

**ALTERNATIVES:**

This report is presented to the Board for information only.

**FINANCIAL IMPLICATIONS:**

Each of the individual work plan projects and activities is funded through the service area budgets that are established annually through the RDN budgets and the Board's Five Year Financial Planning process. As such there are no additional financial implications at this time.

**STRATEGIC PLAN IMPLICATIONS:**

The projects included within the annual work plan are developed based on the direction obtained through the Board's Five Year Financial Plan, Strategic Plan, long term program plans, anticipated departmental activities and specific Board direction that occurs throughout the year. The annual work plan is aimed at achieving the priorities established by the Board's Strategic Plan and/or providing progress towards those established long term goals. In addition to supporting the work plan projects established by the Board, the reporting framework presented and established here also works towards supporting the overall values (including Transparency and Accountability, Communication, Responsiveness and the Focus on Solutions) and Priorities (particularly in terms of Monitoring and Communication) established by the Board in the 2013-2015 Strategic Plan.

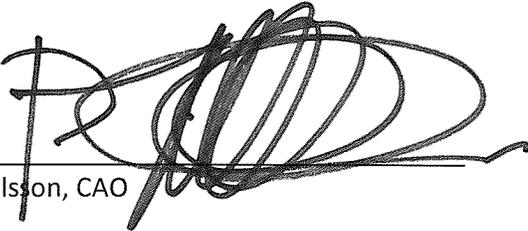

**SUMMARY:**

The reporting framework on the annual work plan projects and activities presented in this report establishes an approach to periodic reporting on the status of the work plans, and provides an easy understanding of how planned projects are proceeding according to schedule, which projects are delayed, and projects that have been rescheduled or supplanted by higher priority work. The overview also provides a brief update/explanation of the project status.

As suggested by the RDN Board this reporting process will benefit the Community, individual Directors and Staff in understanding the work load of the respective Departments, as well as how additional projects brought forward during the year are included in the Work Plans and how reprioritization of new projects and activities are tracked.

**RECOMMENDATION:**

That the Board receive the progress report on the status of the 2014 and 2015 Service Area work plan projects and activities, for information.

  
P. Thorkelsson, CAO
